

Remarks:

No new matter or any matter not supported by the application as filed is introduced by the requested amendments.

The amendments are respectfully requested are needed to correct typographical errors and other irregularities present in the specification and to correct certain errors in the claims introduced by an Examiner's Amendment made in a paper dated 03/27/2008.

The proposed amendments to the specification and claims do not substantively change the subject matter or scope and merely correct typographic errors and therefore require no additional search or examination.

The claims are patentable as indicated by the Notice of Allowability and the requested amendments merely correct typographic errors and do not change the scope or subject matter of the claims and thus the claims remain allowable.

The amendments requested herein were not presented earlier because the errors they correct were not identified until the application papers were reviewed upon receipt of the Notice of Allowance.

In the claims, claims 2 and 4 are presented with the identifier "previously presented" where the previously presented version is the version as amended by Examiner's amendment. Claim 3 is presented with the identifier "currently amended" where the amendment is to correct a misspelling introduced by the Examiner's amendment.

Respectfully submitted,

Dated: June 18, 2008
